(57) Abstract:

PROBLEM TO BE SOLVED: To provide an agent for imparting bactericidal activity, having excellent safety, exhibiting high bactericidal activity for a long period and producible at a low cost and provide

a method for imparting bactericidal property.

SOLUTION: Water having bactericidal activity is produced by using a bactericidal property imparting agent containing shell powder and contacting water with the agent. The bactericidal property imparting agent is produced by sintering scallop shell powder together with other inorganic material.
